Overview of the Process

Dr. Keenum explained the context for the roundtable. Then Jerry Emison explained the process of structured brainstorming. The full group broke into two smaller groups to discuss the two questions for the day. In each small group, the facilitator moderated the brainstorming process and recorded the ideas. The group reviewed potential for consolidating recorded ideas. For multi-voting, each participant had five votes (colored dots) and put them beside items they viewed as most valuable. Each participant could put up to three on any one item. The votes were tallied; results were discussed. At the end of the day, the two groups reported out their high-vote-receiving items to the full group.
